

LDV Vision Summit 2019

Wednesday 22 May 2019, 08:00AM
Thursday 23 May 2019, 06:00PM

Information Technology, Artificial Intelligence

SVA Theater
333 W 23rd St
New York City, NY 10011
United States

Price: \$818

Overview

Visual Technologies leveraging computer vision, machine learning and artificial intelligence are revolutionizing how humans communicate and do business. New innovations are emerging every month and our visual technology market is poised for exponential growth. As a result, companies are struggling to leverage the right solutions to help them adapt and thrive in the new world. Join us for an interactive two-day summit to discuss trends and technologies. Meet the world's brightest technology innovators - and learn firsthand how their visions will transform visual communication and boost or disrupt your businesses.
